

## **2025 litter pick statistics**

### **From our volunteer litter-picker:**

Total time spent - 28.75 hours

17 large bags of rubbish collected plus 1 bag containing 3 Nitrous Oxide canisters.

Unfortunately, our volunteer is no longer able to carry on. This is likely to result in an increase in visible litter/rubbish around the village.

Currently we hold two community litter-picks a year, although the take-up from the community to get involved in these can vary and has on occasion been disappointing.

### **From our community litter picks:**

April 2025 – 7 bags (not full)

November 2025 – 5 bags (not full)

In addition, our Caretaker/Handyperson picks up any rubbish when out at Station Road and Potterhanworth Road sites.

Council may want to consider how it wants to tackle the litter issue going forwards, to ensure that the village is kept as tidy and litter-free as possible.
